

IsoGlaze - Low Corrosivity Granular De-Icer

IsoGlaze is an active formulation that starts working immediately by heating up on contact with snow or ice, its resultant brine leaves no mess but seeps into the aggregate for a period of 48 hours meaning you only have to apply it once over 2 days .

APPLICATIONS

- Platforms
- Depots
- Embedded track
- Pedestrian walkways
- Parking Lots
- Maintenance walkways

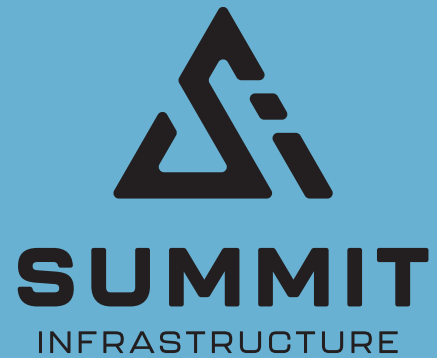

BENEFITS

- Works 6x faster than salt
- Lasts longer -for at least 48 hours
- Dissolves leaving no messy residue
- Environmentally friendly to plants and vegetation
- Significantly less corrosive on concrete & metals, preserving assets and infrastructure over the longer term
- Spreads 3x further meaning you use 1 bag compared to 3 bags of salt to melt and cover an area the equivalent of 1000 sqm
- Works to temperatures as low as -33c
- Less harmful to small pets and animals

CERTIFICATION

- Transport for research Laboratory ,Anti-icing properties up to 48 hours
- Skid Resistance—similar to water on a concrete surface
- ISO 14001—Environmental Management certificate

Available across Canada
